

Imagine a **FASTER RETURN** on investment

Implementation made easier than ever

LOADSPRING has been endlessly obsessed with turning software implementation into a fine art. That's just what fanatical overachievers do – get you from 0 to ROI in record time.

No matter what software you plan to use—project, program or portfolio management— implementation is simpler with the help of our dedicated Services Division. These are the same consultants and IT brainiacs you've already come to know as major problem solvers. Their expertise in project management, IT, training and change management assures that your implementation will go smoothly and will simplify your job.

Having worked with professionals like you from all over the world, we've mastered the ability to serve the largest companies and crack the most complex enterprise implementation challenges out there.

Our accelerated implementation approach means your software will be used correctly—faster than ever. That's the kind of speed that helps you get the benefits of greater efficiency sooner—along with a swift return on investment.

Breaking the implementation speed barrier

LOADSPRING cunningly hastens the whole process with advantages like pre-configured templates, role-based training and hands-on mentoring. From QuickStart options to full custom builds, it all helps put time sheeting, scheduling, status updates, metrics and more on the fast track.

We employ easy-to-use integration modules that help connect your most important business systems, such as ERP and collaboration portals. That way you can have a single place to get the 30,000-foot performance overview you're looking for.

With LOADSPRING implementation solutions, you'll get everything you need under one very high-tech roof. Imagine never having to deal with multiple vendors or consultants. It's just you and us, working with one integrated vision and roadmap. It's a simple, honest partnership with a team you know. We only grow and prosper if you grow and prosper.

Speed = Time, Time = Money

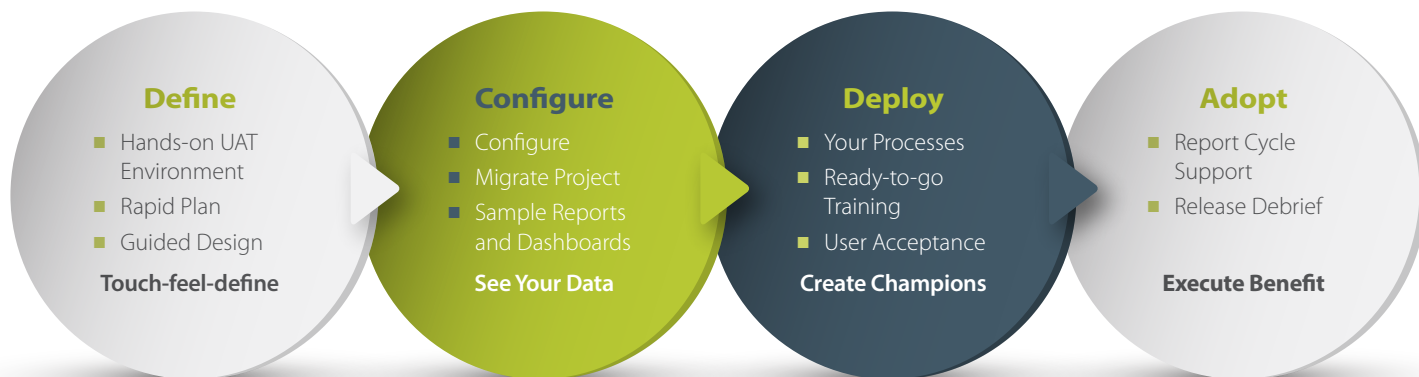

Everything we do to perfect implementation can mean more money in your pocket:

- **Faster software ROI**
- **User learning time is slashed**
- **Minimize lost opportunities**
- **Proven configurations**
- **Faster software adoption and usage**
- **Access to the newest applications**
- **Everything done by project management experts**

Tiered Implementation Options

Accelerated Implementation

LOADSPRING helps you minimize steps, time and cost while getting your team up to speed more easily.

We turn implementation into a no-brainer

Imagine a team that understands that software implementation and enterprise project management represent huge business decisions. That's us. We also know that your business results need to be equally huge if you want a decent return on investment.

So LOADSPRING implementation is all about changing the way you do business—and getting your people onboard from Day One.

And because our *SpringBoard*™ Portal makes your PM software a breeze to access and use, your entire project team will stress less and produce more.

Been here, done this

With decades of PM and engineering knowledge under our collective belt, we know how to get things done. We've seen every kind of problem and are always looking to solve more—regardless of the software used.

Accelerated implementation is just one of dozens of ways we make your professional life a little better every day. What we offer is one-stop shopping for all of your implementation needs, including hosting and full solution services.

In short, you can trust us to help you get the project done—and make it look easy in the process.

We are ready to make your job simpler and easier.

Fast, easy, mobile. Now.
