

SpringBoard

Go on—let the power go to your head

Don't just manage the cloud. Dominate it.

Imagine ruling the Cloud, making it do what you want, when you want it. That's what it's like to use the powerful *SpringBoard™* cloud portal. It's your gateway to total Program Management control and flexibility. Right now.

Fact is, *SpringBoard* now does more things for more people than ever. Not just for power users, but everyone on your team—from executives and administrators to managers, contractors and collaborators. Create your own Program Management suite from scheduling, estimating, BIM and mobile in the cloud, and whatever specific applications that your team needs. All with greater performance and ease.

Better yet, moving your applications and data to the LOADSPRING Cloud means lower cost of ownership.

Can You Handle the Power?

Of course you can. Because all this performance is immediately available through our incredibly intuitive user interface allowing you to create your Perfect Cloud . . . Your apps. Your integrations. Your performance infrastructure.

Road warriors will love this

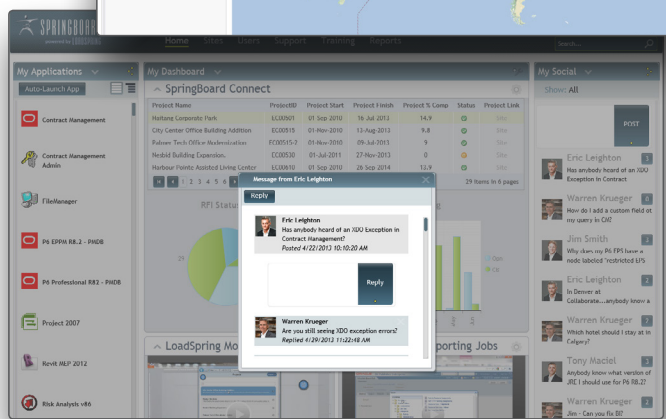

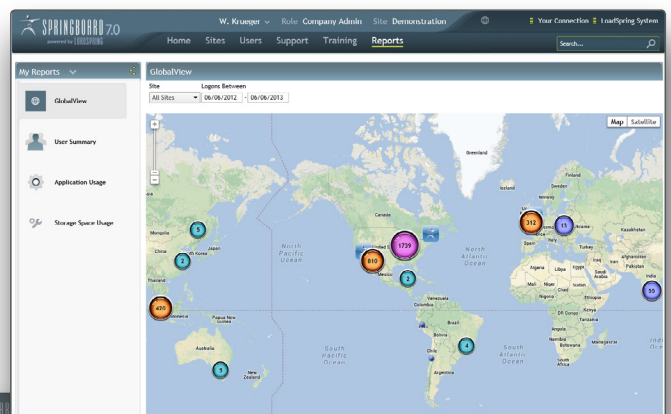

Now you can seize control of your most potent Program Management suite ever. You'll get effortless, secure software access and support—without needless complexity or frustration.

Here's just a sample of *SpringBoard's* many strengths:

SpringBoard Connect. This configurable reporting dashboard gives you the freedom to access and view critical data from multiple applications—directly from your *SpringBoard* interface. Now your executive team can view what they need. Anytime.

GlobalView Reporting. Uses realtime geosite mapping to let you see which team members are logged in, anywhere on earth. A simple click on our *GlobalView* map creates an instant report of who's using what from where for better planning and license tracking.

PM Social. It's what you might call the "Social Media of Project Management." This private, assignment-based messaging network is built right into *SpringBoard*. It helps keep all your team members in touch, in tune and in the know.

Don't mess with success

SpringBoard 7.0 also gives you the features you've come to know and depend upon. All your favorite LOADSPRING solutions are even better:

- Fast, easy deployment in days, not months
- Location Aware so you know where your team is
- Certified, enterprise-level security
- Instant access to LOADSPRING Academy
- Single sign-on for Oracle Primavera applications
- Lightning-quick SmartSupport issue resolution
- Advanced provisioning lets administrators assign users and roles in a snap
- Scalability of user counts
- Auto Performance Indicators monitor connections and performance
- Self-registration saves administrators time and drudgery
- Painless software license tracking

Imagine everyone getting along

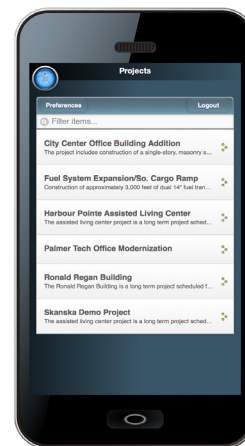

New technologies aren't always compatible with other innovations, but in LOADSPRING's world, all of our solutions interact in perfect harmony:

SpringBoard also works perfectly with **SharePoint Connector** to view and update information bi-directionally in Primavera P6 and Primavera Contract Management. It's the newest way to squeeze the most from the Cloud.

Additionally, **LoadSpringMobile** is available with *SpringBoard* so your field staff can easily interact with project data using iPads, tablets, and smartphones.

The minute you start using *SpringBoard*, you'll see how much easier it is to manage, integrate, and share applications, data and ideas worldwide. It's by far the best way yet to get everything you and your constituents need. We'll even help you plan your Program Management pathway to the Cloud.

So go ahead—let *SpringBoard* satisfy your desire for power and control. Call or email us now.

Three ways to master the Cloud...your way

Controlling the Cloud takes more than just cookie-cutter technology. Fortunately, SpringBoard works within three custom Cloud environments:

- **SpringBoard Cloud Essentials.** All the application and secure data access you demand, with industry-leading support, backup and recovery assurance.
- **SpringBoard Private Cloud.** Tailored to your specific needs, it's the Cloud—your way. You get more custom solutions, with all the Cloud's most important elements.
- **SpringBoard Global Cloud.** Ensures that all your information is synchronized in real time. With true performance-based location awareness, it "knows" where your team members are and auto-routes them to our closest Data Center for maximum performance.

Fast, easy, mobile. Now.
