

The **ULTIMATE CLOUD PLATFORM** for Your Perfect PM Cloud Strategy

LOADSPRING CLOUD PLATFORM. Built to make project success easier.

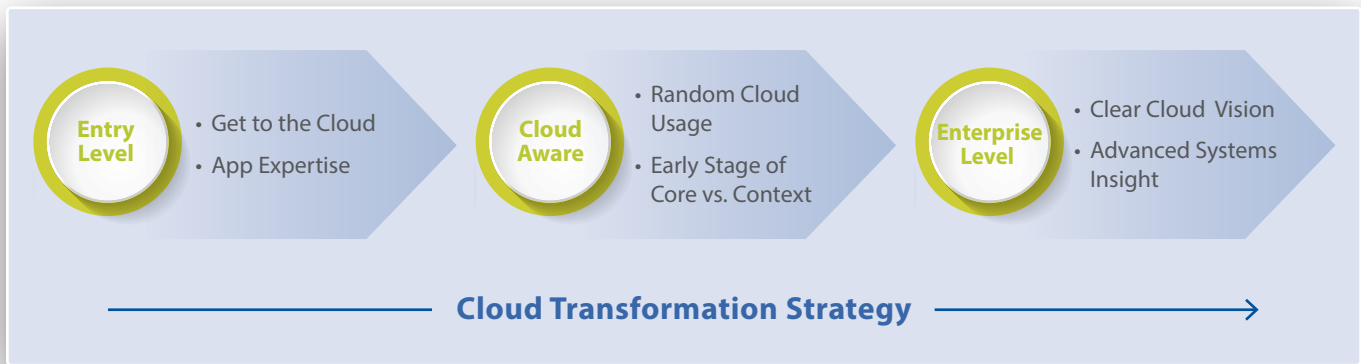

Are you still getting by without an innovative cloud strategy in place? Still lacking the ideal Project Management platform? Well, it's time you had a better way to access, administer and increase the ROI from all your project management apps and data.

These days, smart enterprises are empowering innovation by adopting game-changing cloud strategies and using ingenious tools that boost efficiency, competitive advantage, and ROI. Those who aren't—aren't.

Lucky for you, LOADSPRING CLOUD PLATFORM and our zillion years of expertise can modernize your whole cloud strategy, and help your teams work faster, smarter and a lot more profitably.

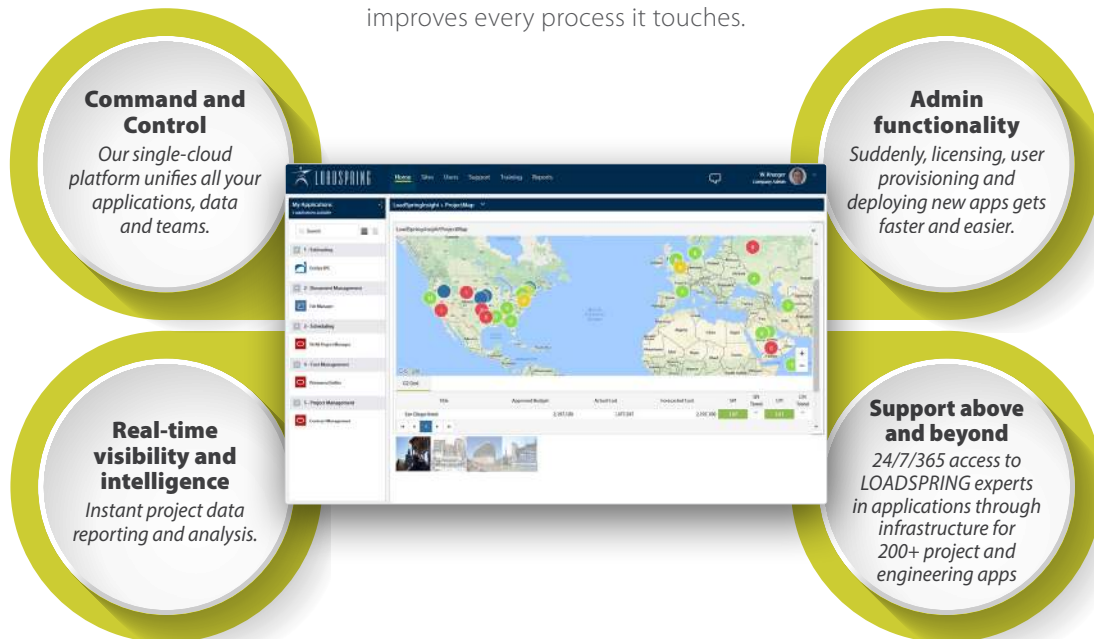

Where are you on the Cloud Maturity Scale?

When you partner with LOADSPRING™, we'll guide you from unknown... to unstoppable.

This changes everything

From project execs to IT professionals and field teams, everyone agrees that LOADSPRING CLOUD PLATFORM improves every process it touches.

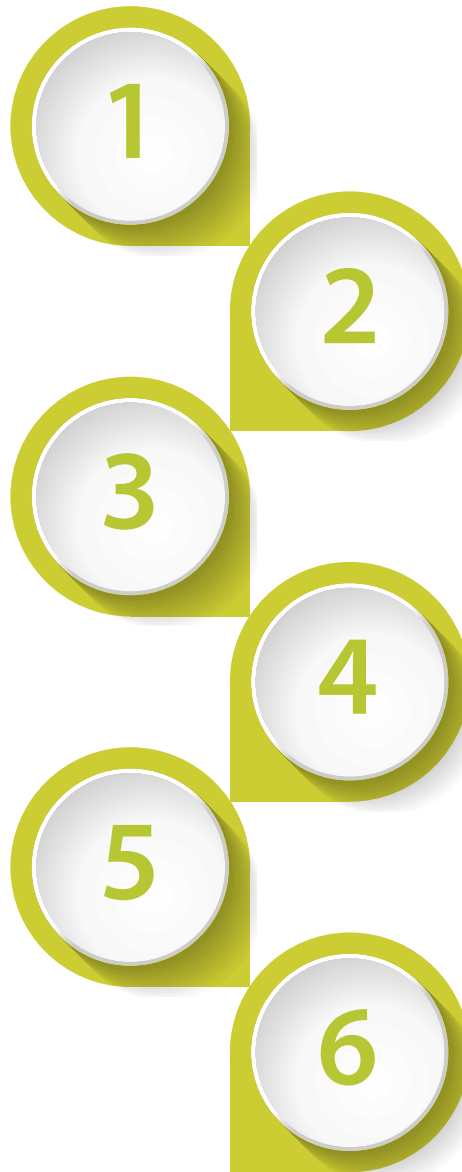

SIX COMPELLING REASONS you can't live without LOADSPRING CLOUD PLATFORM.

All for One, One for All. Our single, centralized platform is your passport to all your Project and Engineering applications for greater efficiency and ROI. Your execs, admins, IT and field teams can effortlessly access apps while communicating and monitoring progress across your entire project suite. And the platform enables you to respond to the needs of your Line of Business faster.

Built-in Security is always "on" and features two-factor authentication, and Federated services are available for even better control. This impenetrable, hack-halting system includes SOC 2 Type II certification and offers total protection for your irreplaceable project data and communications.

Real-Time Reporting. Our built-in LOADSPRING*Insight* tool lets managers view critical BI data from multiple apps for better-informed decisions. An Advanced Performance Management feature automatically compares predetermined performance targets to real performance. Plus, our clever CIO dashboard gives security threat analysis and uptime reporting. And finally, GlobalView Reporting shows project and app usage at a glance for unmatched license management and compliance.

Star Quality Support. Our 24/7/365 unified support system covers everything from infrastructure to individual applications. Also, your admins can review all open cases and review their status. Plus, our built-in Smart Support system offers instant self-help solutions.

Power to the Admins! LOADSPRING CLOUD PLATFORM empowers your behind-the-scenes organizational heroes. Now they can manage apps, licensing, Auto Archiving and provisioning—all without burdening IT. They can also assign teams to different projects and gain control of active project status, user training and more.

LOADSPRINGAcademy – also built right into LOADSPRING CLOUD PLATFORM—becomes your virtual training campus. Users get instant access to pre-recorded learning videos and quizzes, as well as your own uploaded training materials.

Go for it. See how LOADSPRING CLOUD PLATFORM empowers innovation by improving your ability to meet the ever-changing needs of your Line of Business. Now you can master hundreds of project apps, crank up efficiencies, make more timely business decisions and wrestle down costs. Watch our highly-persuasive demo video at loadspring.com.
