

# Get Empowered. Get Innovative.

# GET LOADSPRING.™

## Your added edge in project ROI

Any business worth its salt has a core philosophy. LOADSPRING's can be summed up in eight syllables: Empowering Innovation. Our Project Management and infrastructure gurus *empower* you to advance your Cloud-forward strategy and gain flexibility to *innovate* and adapt to ever-changing project needs. All while lightening your IT burden of securing, accessing, and maintaining best-of-breed Project Management software.

## The bottom line—Right up top

More than just a Cloud hosting firm, LOADSPRING's managed services help you better-control every project while creating project success, value and mitigating risk.

We're the only provider that's 100% obsessed with Project Management and Engineering apps. We deliver quicker, easier and safer Cloud transition strategies and then guaranteed access to all your data (with expertise in over 200+ purpose-built applications). LOADSPRING can actually make you a faster, better-informed decision-maker by giving you a thousand and one ways to plan, monitor, evaluate, and fine-tune major projects throughout their lifecycle.

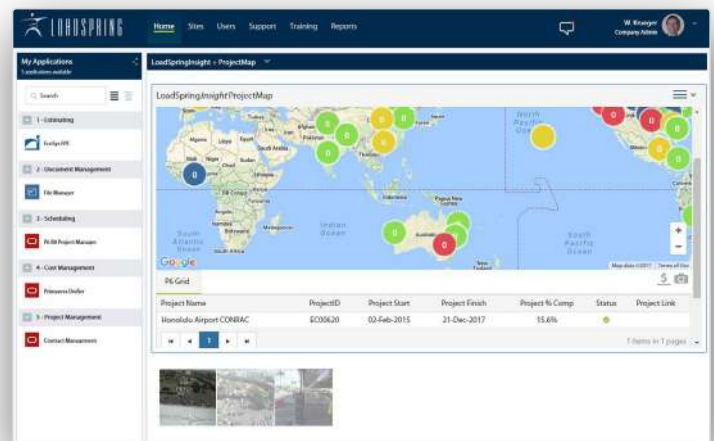

By custom-building your ideal global Cloud, we give you a *single source* for all your infrastructure, support and security needs —without capital expenditures. Result? Your IT workload and risks go down while efficiency and margins go up.

## The only Cloud that's truly YOURS

Nobody can tailor a time-saving, headache-relieving Cloud quite like our passionate specialists. We're masters at getting you up and running in your choice of personalized Cloud environments that keep your teams, projects, and ROI on track. All in one simple Cloud ecosystem. What's most important to you? Advanced integrations? Having your PM data synchronized for your global teams? Getting greater Cloud performance for serious high-activity projects? Virtually real-time support? Or maybe fool proof backup and recovery? Our Cloud and project mavens will supply all that and help you achieve your goals.

## We lead so you can, too

Ask anyone. LOADSPRING is the absolute, undeniable market leader in customizable Project Management and Engineering software Cloud solutions. We didn't get here by being generalists or supplying customers with access to a few apps and a warehouse-sized load of storage. Instead, we focus on making you a leader by solving *your* unique challenges with our LOADSPRING CLOUD PLATFORM. You can relax knowing that our legions of Cloud and app geniuses keep you up and running while supporting your global Cloud needs. We serve as your lifeline to expert support, license and user management and intelligence tools and more.

## LOADSPRING CLOUD PLATFORM - More than just access

How we squeezed so many benefits into one platform is our little secret. All that matters is that we offer all this:

**SECURITY AND PERFORMANCE.** No one tops our secure software access, multi-level threat prevention, remote security and other trusted protection measures. We devoutly follow ISO/IEC 27002:2005 standards and are SOC 2 Type II certified. The LOADSPRING CLOUD PLATFORM—along with our system and security analysts and operating procedures—efficiently reduce the risk of ugly data attacks or losses, while performing up to 62% faster than generic cloud competitors.

**PROJECT INTELLIGENCE.** Executives and managers can get a 30,000-foot view of critical project data points, even from multiple applications. By observing progress, you can make highly-educated assessments in record time.

**RAPID, CENTRALIZED SUPPORT.** Our live, human problem-solvers and automated 24/7/365 support assure that your infrastructure runs smoothly and that application upgrades and maintenance run reliably in the background. The LOADSPRING CLOUD PLATFORM even supports user education by teaching your people how to use and embrace your most critical apps.

**ADVANCED REPORTING.** We simplify your reporting cycles by allowing all your engineering and project data to work in unison within a single CIO dashboard. Other automated reporting functions include user utilization reports, license administration, project mapping, and so much more.

**EFFICIENCY.** LOADSPRING offers less costly, more active ways to manage large, complex projects. Examples include zero capital expandable resources, reduced IT infrastructure costs, improved time to value on software, and better use of people and material. These advantages mean faster project completion, fewer risks, and healthier margins.

### We feel your pain. And relieve it.

Our years of experience have taught us a lot about your goals, challenges, and yes, your pain points. We know the importance of stellar software performance, reduced capital spending, greater project intelligence, increased revenue, and a nice, big slice of new business. Is that so much to ask?

Managing all of the above on your own isn't exactly rainbows and unicorns. Lucky for you, LOADSPRING empowers you to implement your Cloud-forward plan and develop flexibility in meeting ever-shifting project needs. Our Cloud-based solutions and very, very smart people will assist you with:

**Every application you'll ever use**, both today and throughout your project's lifespan.

**Providing expert security and support** to reduce application cost and risks

**Standardizing** on best-of-breed software selection

**Eliminating** application upgrade delays and downtime expenses

**Controlling** software version timing changes

**Guaranteed** infrastructure uptime without data loss

**Sandboxing** apps prior to launch

**Accelerating** deployment

**Streamlining** license usage and reporting

And don't be surprised if your corporate image takes on a new shine, too.
