

THE CASE FOR UNIFIED CLOUD CONTROL:

13 STATS THAT SAY IT ALL

The move to the cloud isn't slowing down—it's accelerating. More organizations are demanding centralized control, integrated systems, and end-to-end visibility.

The Cloud Surge

81% of architecture, engineering, and construction (AEC) firms use a hybrid cloud model (IT Brief)

48% plan to migrate half their apps to the cloud by 2025; 20% aim for full migration (CloudZero)

60% of organizations will run over half their workloads in the cloud by 2025, up from 39% in 2022 (CloudZero)

73% of executives say cloud adoption increased revenue (IBM)

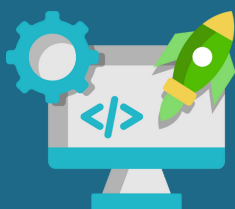

68% reduced operational costs via the cloud (IBM)

81% of IT leaders say data silos are hindering digital transformation efforts (Salesforce)

70% of respondents report successful cloud migrations when using a third-party service provider, but only 39% say the same about self-deployment (Vantage)

90% of organizations will adopt hybrid cloud by 2027 (Gartner)

\$723.4B in global public cloud spending is projected for 2025, up 21.5% from 2024 (Gartner)

The ROI is Real

Cloud migration can cut Total Cost of Ownership (TCO) by up to 40% (Accenture)

65% of organizations reported faster time to market with cloud computing (IBM)

Serverless data integration platforms can reduce operational costs up to 40% (Flexera)

94% of businesses report significant improvements in online security after moving data to the cloud (Salesforce)
